

## Patent Search – DIY easily

Date:	Tuesday, 06.11.2024 / 1:30 pm until 5:30 pm
Form:	Webinar via Livestorm®
Prerequisite:	You are interested in protection of technical inventions and research in patent data bases.
Costs:	This webinar is for free.
Language:	English

### Contents:

An invention must be new worldwide in order to be protected by a patent. Therefore, it makes sense to search for older, similar inventions before filing a patent application.

We will show you how to search the most important free search engines (see.ip, ESPACENET, DEPATISNET), and we will practice with you using practical cases.

### After the webinar you will know

- which search engines are suitable for you;
- how to do simple searches yourself;
- what you can conclude from the search results;
- how to find out if and where a patent is still valid;
- why it makes sense to stay tuned to patent search!

### Organisational matters:

We look forward to your questions and contributions to the discussion.

If you have any questions or problems, please do not hesitate to contact us at

[ip-academy@patentamt.at](mailto:ip-academy@patentamt.at) or by telephone on 01/53424.

We look forward to seeing you!
